## EDUCATION

### University of Waterloo

Sep 2020 – Apr 2025

*Bachelor of Computer Science (Honours), Minor in English Literature*

*Waterloo, ON*

- **Relevant Coursework:** Data Structures & Algorithms, OOP, Operating Systems, Networks, Artificial Intelligence, User Interfaces, Human-Computer Interaction, Technical Writing

## EXPERIENCE

### DevOps Engineer, Intern

Sep 2024 – Present

*Nasdaq*

*Toronto, ON*

- Increased GitLab CI/CD pipeline success rates for high-performance trading systems by **86%** through Sonatype scan integration.
- Decreased critical vulnerabilities by **93%** by generating SBOM-based security reports for Java, Node, and Python projects.
- Created a version control system for AWS RDS instances enabling branch-specific schema, schema reverts, and fast-forwards.
- Decreased CI/CD pipeline runtime by **80%** by caching public Maven packages and Docker images using proxy repositories.
- Improved scalability with Terraform IaC, cutting manual configuration time by **57%**.

### DevSecOps Engineer, Intern

Jan 2024 – Apr 2024

*Dandelion Networks*

*Toronto, ON*

- Automated image deletion with Jenkins and Ansible, reclaiming **42.75%** of EBS storage space.
- Deployed Grafana and Prometheus for EC2 monitoring, boosting actionable insights by **150%**.
- Streamlined EC2 instance monitoring setup, reducing manual effort by **97%** with Terraform and Prometheus.
- Created a custom message queuing service to transfer container logs to S3, reducing VM storage costs by **12%**.

### System Administrator, Intern

May 2023 – Sep 2023

*Cogeco Connexion*

*Burlington, ON*

- Developed a GCP cost management app, significantly reducing monthly expenses.
- Built a Flask microservice with Pandas to detect cost anomalies, saving **\$2,700** annually.
- Created a Flask microservice using the ARIMA model for accurate cost forecasting and budget planning.
- Saved **\$123,375** annually by optimizing infrastructure, detecting cost anomalies, and improving forecasting.

### Software Engineer, Intern

May 2022 – Dec 2022

*BlackBerry*

*Waterloo, ON*

- Led development of a cloud resource management app with React and TypeScript, improving user experience.
- Boosted React app performance by **54%** with caching, pagination, and throttling.
- Accelerated login speed by **98%** through the application of memory caching techniques.
- Boosted the app's user experience by code splitting, resulting in a **66%** improvement in page load times.

### Product Developer Assistant

Sep 2021 – Dec 2021

*Cloudspark Technology Labs*

*Toronto, ON*

- Designed responsive and user-friendly dashboards using React, Material UI, and TypeScript.
- Developed and published an npm UI library with Material UI components for enhanced code reusability.
- Programmed efficient CosmosDB stored procedures for automating data projection deletion.

## PROJECTS

**Sticky Note** | *Kotlin, Gradle, JavaFX, Spring, EC2, Apache Tomcat, SQLite, JUnit*

Jan 2023 – Apr 2023

- Built a full-stack notes application with a Spring REST service in Kotlin and a JavaFX frontend.

## SKILLS

**Languages:** Python, C/C++, SQL, Bash, JavaScript, TypeScript, Go, HTML/CSS, Kotlin, R

**Tools and Frameworks:** Linux, Git, Docker, Jenkins, Ansible, Terraform, AWS, GCP, Kubernetes, Grafana, Prometheus, Maven, Flask, Node.js, React.js, Spring, Nginx, MongoDB, Liquibase, Snyk, Sonatype Nexus, Figma
